## DETAILED ACTION

1. Claims 1-34 are pending.
2. Applicant's election without traverse of Group I, claims 1-14 in the reply filed on 12/10/09 is acknowledged.

Claims 15-34 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b) as being drawn to nonelected inventions.

*Claims 1-14 read on an in vitro method for analyzing a sample from a mammal in connection with at least one cardiovascular disease, comparing determining the cardiovascular functionality of the isolated bone- marrow precursor cells by means of a migration assay are under consideration in the instant application.*

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:  
A person shall be entitled to a patent unless --  
*(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.*
5. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Vasa et al ( IDS).

Vasa et al., teach an in vitro method for analyzing a sample from a mammal in connection with at least one cardiovascular disease, comparing determining the cardiovascular functionality of the isolated bone- marrow derived precursor cells by means of a migration assay ( see entire document, Abstract in particular). Vasa et al., teach that said isolated precursor cells are characterized of expressing Cd34+, CD133+ and CD45+ ( see Materials and Methods in particular). Vasa et al., teach that migration assay was performed in a Boyden-chember using

Art Unit: 1644

VEGF ( see page 2 in particular). Vasa et al., teach that migration capacity of precursor cell is an independent determinant to predict a cardiovascular functionality of said isolated precursor cells ( see overlapping pages 5 and 6 in particular).

The reference teaching anticipates the claimed invention.

6. No claim is allowed.
